(1) City National Asset Management, Inc., the Fund's investment adviser ("CNAM"), has contractually agreed to waive the shareholder servicing fees for Class N shares until January 28, 2012. Prior to that date, this arrangement may be terminated without penalty by the Fund's Board of Trustees upon 60 days' written notice to CNAM, and it will terminate automatically upon the termination of the shareholder services agreement between CNAM and the Fund.

(2) CNAM has contractually agreed to limit its fees or reimburse the Fund for expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding taxes, interest, brokerage commissions, extraordinary expenses and acquired fund fees and expenses) through January 28, 2012 at or below 1.00% for Institutional Class shares and 1.25% for Class N shares. EXAMPLE

This Example is intended to help you compare the cost of investing in the Limited Maturity Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Institutional Class	\$ 75	\$ 229	\$ 397	\$ 884
Class N	\$ 100	\$ 363	\$ 647	\$ 1,456

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 118% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

At least 80% of the Limited Maturity Fund's portfolio consists of fixed income securities either issued or guaranteed by the U.S. Government or its agencies or instrumentalities, money market instruments and non-convertible fixed income securities (i.e., bonds which cannot be converted into stock) of U.S. companies. At least 80% of the Fund's portfolio consists of fixed income securities with "limited maturity," i.e., a maturity of less than five years. The Fund invests in securities having one of the four highest ratings of either Moody's Investors Service (at least Baa) or Standard & Poor's (at least BBB).

Please review the remainder of this prospectus and the statement of additional information for more detailed descriptions of these principal investments and other securities in which the Limited Maturity Fund may invest.

PRINCIPAL RISKS OF INVESTING IN THE FUND

As with any mutual fund, there are risks to investing. Neither the Limited Maturity Fund nor CNAM can guarantee that the Fund will meet its investment goal. The Fund will expose you to risks that could cause you to lose money. Here are the principal risks to consider:

The Effect of Interest Rates – The Fund's yield typically moves in the same direction as movements in short-term interest rates, although it does not do so as quickly.

Market Risk of Fixed Income Securities – The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers, including governments. Generally, fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, with lower rated securities more volatile than higher rated securities. The duration of these securities affects risk as well, with longer term securities generally more volatile than shorter term securities.

Issuers – The Fund may be adversely affected if the issuers of securities that the Fund holds do not make their principal or interest payments on time.

Government-Sponsored Entities – The Fund invests in securities issued by government-sponsored entities which may not be guaranteed or insured by the U.S. Government and may only be supported by the credit of the issuing agency.

Prepayments – As a general rule, prepayments of the principal of the loans underlying mortgage-backed or other pass-through securities increase during a period of falling interest rates and decrease during a period of rising interest rates. In periods of declining interest rates, as a result of prepayments the Fund may be required to reinvest its assets in securities with lower interest rates. In periods of increasing interest rates, the securities subject to prepayment risk held by the Fund may exhibit price characteristics of longer-term debt securities.

Extension – Rising interest rates can cause the average maturity of the Fund's holdings of mortgage-backed and other pass-through securities to lengthen unexpectedly due to a drop in prepayments. This would increase the sensitivity of the Fund to rising rates and the potential for price declines of portfolio securities.

Rating Agencies – A credit rating is not an absolute standard of quality, but rather a general indicator that reflects only the view of the originating rating agency. If a rating agency revises downward or withdraws its rating of a security in which the Fund invests, that security may become less liquid or may lose value.

Management – The Fund's performance depends on the portfolio managers' skill in making appropriate investments. As a result, the Fund may underperform the fixed income market or similar funds.

Defensive Investments – During unusual economic or market conditions, or for temporary defensive or liquidity purposes, the Fund may invest 100% of its assets in cash or cash equivalents that would not ordinarily be consistent with the Fund's investment goals.

(1) Performance for "Since Inception" for all classes is shown for periods beginning October 22, 1988, which is the date the predecessor to the Limited Maturity Fund (the "Predecessor Fund") commenced operations. On September 30, 2005, the Predecessor Fund reorganized into the Fund. The performance results for Institutional Class shares of the Fund before September 30, 2005, reflect the performance of the Predecessor Fund's Class I shares. Class A shares of the Predecessor Fund, the predecessor to the Class N shares of the Fund, commenced operations on October 22, 2004.

The performance results for Class N shares of the Fund for the period of October 22, 2004 to September 29, 2005, reflect the performance of the Predecessor Fund's Class A shares. The performance results for Class N shares of the Fund for the period of October 22, 1988 to October 21, 2004, reflect the performance of the Predecessor Fund's Class I shares. The performance of the Predecessor Fund's Class I shares has not been adjusted to reflect the higher Rule 12b-1 fees and expenses applicable to the Fund's Class N shares. If it had, the performance of the Fund's Class N shares would have been lower than that shown.

For each index shown the measurement period used in computing the returns of the index for the "Since Inception" period begins on October 31, 1988.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. The performance of Institutional Class shares does not reflect Class N shares' Rule 12b-1 fees and expenses. After-tax returns for Class N shares will vary from the after-tax returns shown above for Institutional Class shares. The after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.
